Item No. Z1.298.1253.0

### Fuse disconnect lever THSI 5X20LED 60

Fuse disconnect lever for disconnect terminal blocks selos / fasis / taris

|            |               |
|------------|---------------|
| Item No.   | Z1.298.1253.0 |
| EAN        | 4015573710856 |
| order unit | 10 Piece(s)   |

## Approvals

## Technical data

### General

|                                                            |                 |
|------------------------------------------------------------|-----------------|
| Colour                                                     | Grey            |
| Width/grid dimension                                       | 6 mm            |
| Insulating housing                                         | PA666           |
| Inflammability class of insulation material acc. with UL94 | V0              |
| Mounting method                                            | Direct mounting |
| Fuse insert                                                | G-fuse 5x20 mm  |

### Technical data

|                             |               |
|-----------------------------|---------------|
| Rated voltage               | 250 V         |
| Closing plate required      | No            |
| Length                      | 45.2 mm       |
| Type of insulation material | Thermoplastic |

### Accessories

|                                                |                  |
|------------------------------------------------|------------------|
| Remark to rated voltage                        | Note fuse insert |
| Remark to rated current                        | Note fuse insert |
| Defect indicator                               | LED              |
| Minimum operating voltage of defective display | 24 V             |
| Maximum operating voltage of defective display | 60 V             |
