Connectors > MiniBridge 1.27 mm > Single Row Cable Connectors > Vertical Female Type A

The IDC female connectors are available with different types of locking latches for normal vibration/shock loads (black or white model) as well as applications involving heavy vibration/shock loads (red model). The robust version (red) requires a tool for releasing. Because of no formation of shades, the white version is particularly suitable for lighting applications. The cable guide ensures that attaching the cable is a simple operation.

product no. 464244

Application: Cable Connectors
 Gender: Female
 Orientation: Vertical
 Pins: 6
 Pitch: 1.27 mm
 Termination: IDC
 Interlocking: positive lock
 Color: red
 Wire Cross Section: AWG 22
 RoHS Compliant: [Yes](#)
