Round Pushbutton Switch PC Mount

Compact, momentary switches mount on .625 inch (15.87 mm) centers in rows or matrix arrays and are the same height and panel size as Switchcraft's Hi-D Jack. Rugged "box" body protects contact springs against mechanical damage and keys them in precise alignment. Precision springs produce high contact pressure, smoother wear-reducing actuation, and positive "make-break". Recommended where contact resistance is not critical.
