

## Conflict Minerals

Honeywell is committed to comply with all laws and regulations applicable to our business, including the Conflict Minerals laws and regulations regarding the sourcing of tantalum, tin, tungsten and gold from certain mines within the conflict regions of the Democratic Republic of the Congo and bordering countries.

We anticipate that our Conflict Minerals program will include a number of elements, including the following:

1. Analysis to determine which Honeywell products contain the subject metals and whether the metals are necessary for the functionality of the product or are otherwise covered by the Conflict Minerals rules;
2. Development of a reasonable due diligence standard to be rolled out across our global supply chain; and
3. Communications with our global supply chain partners regarding the requirements of the Conflict Minerals rules.

We share the concerns regarding Conflict Minerals and are committed to work with our global supply chain to ensure full compliance with the law.
