

# Power Chokes – Vertical Mount

The Coilcraft PCV power chokes are low cost power inductors whose simple design provides rugged reliability and performance. They feature 130°C class insulation and are available in a wide range of standard values.

The open core construction provides the highest saturation current available in a low cost power choke. These parts use a ferrite bobbin core to provide the highest possible inductance at the lowest cost. The PCV-1 Series incorporates a plastic mounting header for maximum lead protection and consistency.

Coilcraft **Designer's Kit P405** contains samples of the part numbers shown in bold from the PCV-0 and PCV-2 series. Contact Coilcraft or visit <http://order.coilcraft.com> to purchase on-line.

## PCV-0 Series

## PCV-1 Series

## PCV-2 Series

Dimensions are in  $\frac{\text{inches}}{\text{mm}}$

**Terminations:** Tin-silver (96.5/3.5) over copper

1. Tested at 15.75 kHz, 0.1 V<sub>rms</sub>, with DC bias applied up to the I<sub>rms</sub> current.
2. Current that causes a 40°C temperature rise from 25°C ambient.
3. **Ambient temperature range:** -40°C to +85°C with I<sub>rms</sub> current
4. **Storage temperature range:** Component: -40°C to +125°C  
Tray packaging: -40°C to +80°C
5. Electrical specifications at 25°C.
6. Parts in bold type are included in Coilcraft Designer's Kit P405.
