## Powered Proto-Board® Systems

- Current limited short-circuit proof power supplies
- Up to 24 14-pin DIP capacity
- 203A includes + 15V/-15V capable of 500mA
- Three versions one kit, two assembled
- All units include 5VDC, 1 AMP power supply
- Includes three QT-59S Quick Test socket strips; four QT-59B Quick Test bus strips; one QT-47B Quick Test bus strip
- Combines utility of a ProtoBoard with highly capable regulated DC power supplies
- [Specifications](#)

### PB-203A

---

5VDC, 1 Amp power supply  
Separate +5.5/-18VDC/-5.5/-18VDC power supplies capable of 500mA @ 15VDC.  
Factory pre-set power to  $\pm 15$ VDC  
Voltages independently adjustable with internal screwdriver adjustment

**Part Number:** P/N 104-2040

### PB-204

---

5 VDC, 1 Amp supply  
Separate +12/-12 VDC power supplies, each capable of 250mA  
Powered from external power pak

**Part Number:** P/N 104-2000

**U.S. Patent Design No. 241,252**

**U.S. Patent Design No. 235,554**
