

## High Power SPT<sup>+</sup> & Lugged Type IGBT Module

### Description

DAWIN'S IGBT 7DM-3 Package devices are optimized to reduce losses and switching noise in high frequency power conditioning electrical systems. These IGBT modules are ideally suited for power inverters, motors drives and other applications where switching losses are significant portion of the total losses.

### Features

- High Speed Switching
- $BV_{CES} = 1200V$
- Low Conduction Loss :  $V_{CE(sat)} = 1.8 V$  (typ.)
- Fast & Soft Anti-Parallel FWD
- Short circuit rated : Min. 10uS at  $T_c=100$
- Reduced EMI and RFI
- Isolation Type Package

### Applications

Motor Drives, High Power Inverters, Welding Machine, Induction Heating, UPS , CVCF, Robotics , Servo Controls, High Speed SMPS

### Equivalent Circuit and Package

Please see the package out line information

### Absolute Maximum Ratings @ $T_j=25$ (Per Leg)
