

Coatings

Why use coatings?

Protective coatings are necessary to ensure a long and effective working life of electrical and electronic components. MG Chemicals offers a wide range of coatings suitable for protecting circuit boards, windings & coils, transformers, field coils, and stator windings from electrical arcing, environmental factors, and physical force.

What can coatings do?

► RESIST ARCING

► RESIST ENVIRONMENTAL AND PHYSICAL FORCES

What is arcing?

Arcing occurs when voltage jumps from one surface to another due to the close proximity of parallel currents. The result is a board malfunction or damaged components. It may occur on any circuitboard without a coating.
