Marking and Packing Information

The part will be marked **PFFM**
YMDx

- Marking consists of the frequency "FF" which will be truncated to the first two digits due to package size.
- Date code consists of Year, Month and Day (see codes below)
- The x is an internal PLE production code
- Orientation of marking may be mixed on the tape
- Traceability of part is lost once removed from reel

Connection (top view):

Pad 2 and Pad 4 are common and connected to the metal cover. They are not connected to the crystal.

Layout and application information

- Trace lengths to the crystal should be kept as short as possible.
- The crystal connections are sensitive to noise.
- The package should be grounded for optimum performance, pad 2 and/or pad 4 connected to ground.

Reflow Cycle (typical for lead free processing)

The part may be reflowed 2 times without degradation.

Tape and Reel: available for quantities of 250 to 3000 per reel (<1000 will be cut tape)
