

ISL9105EVAL1Z

Evaluation Board Application\Manual

AN1346
Rev 0.00
August 3, 2007

Description

The ISL9105EVAL1Z is an evaluation kit for the ISL9105 1.6MHz 600mA low quiescent current, high efficiency integrated step-down regulator. The ISL9105 is capable of delivering up to 600mA output current with an output voltage range of 0.8V to $\sim V_{IN}$. The output voltage is set by two voltage divider resistors of R_2 and R_3 on the board. The default output voltage is set to be 1.6V on the evaluation board and can be modified by changing the R_2 value.

The complete ISL9105 regulator is located at the center of the board. On the left side of the board are the connectors for the input power source (J1 VIN; J2 GND). The output connectors are located on the right side (J4 VO; J5 GND). The other two test points are for the POR (J3) and RSI (J6) signals respectively, as labelled on the board. The RSI input needs either be driven to a low or a high logic input (Please refer to the ISL9105 datasheet, FN6415 for more details regarding RSI function). **Do not leave the RSI input signal floating.** The open-drain POR signal is pulled up to the V_{IN} through a 100k Ω resistor (R_1). Jumper JP1 allows the user to enable or disable the IC. Jumper JP2 is the mode selection input. **Do not leave the EN or the MODE signal floating.** The evaluation board also offers one oscilloscope probe tip connector connected to PHASE pin to minimize the switching noise during the evaluation. One test point (labeled as FB) is connected to the FB pin on the board in order to monitor the FB voltage.

The evaluation board schematic, layout and bill-of-materials (BOM) can be found at the end of this application note.

Ordering Information

PART NUMBER	DESCRIPTION
ISL9105EVAL1Z	Evaluation Board for ISL9105

Pinout

Features

- A Complete Evaluation Platform for ISL9105
- Convenient Jumpers for Enable/Disable, Operation Mode Selection
- 2.0x1.6 Square Inches Board Size Handy for Evaluation
- Pb-Free Plus Anneal Available (RoHS Compliant)

What is Needed

The following instruments will be needed to perform testing:

- Power supplies: DC 10V/1A
- DC Electronic load: 10V/1A
- Multimeters
- Function generator
- Oscilloscope
- Cables and wires

Specifications

Table 1 shows the recommended operation conditions for using the ISL9105EVAL1Z.

TABLE 1. RECOMMENDED OPERATION CONDITIONS

PARAMETER	MIN	TYP	MAX	UNIT
Input Voltage	2.7	-	5.5	V
Output Voltage (Note)	-	1.6	-	V
Maximum Output Current	600	-	-	mA

NOTE: The output voltage can be set to other values by changing the R_2 value, $V_{OUT} = 0.8V \cdot (1 + R_2/R_3)$.

Evaluation Board Setup

The following are steps for setting up the evaluation board:

1. Connect Jumper JP1 at the position of "Enable" to enable the device. Connect JP1 at the position of "Disable" will disable the device.
2. Connect Jumper JP2 either at the position of "SKIP" or "Forced PWM". With JP2 connected at the position of "SKIP", the device enters skip mode under light load condition; with JP2 connected at the position of "FORCED PWM", the device always operates under PWM mode regardless of the load condition.
3. Connect the RSI input to either ground or VIN. Do not leave it floating. Please refer to the ISL9105 datasheet, FN6415 for more details regarding the function of RSI.
4. Connect a DC power supply with voltage range of 2.7V to $\sim 5.5V$ to VIN (J1) and GND (J2) connectors. Make sure the power supply has enough supply current capability. Do not adjust the V_{IN} higher than the recommended maximum supply voltage (5.5V).
5. Connect the output to a load (resistor or electronic load).
6. Turn on the input power supply and evaluate the device.

Notice

1. Descriptions of circuits, software and other related information in this document are provided only to illustrate the operation of semiconductor products and application examples. You are fully responsible for the incorporation or any other use of the circuits, software, and information in the design of your product or system. Renesas Electronics disclaims any and all liability for any losses and damages incurred by you or third parties arising from the use of these circuits, software, or information.
 2. Renesas Electronics hereby expressly disclaims any warranties against and liability for infringement or any other claims involving patents, copyrights, or other intellectual property rights of third parties, by or arising from the use of Renesas Electronics products or technical information described in this document, including but not limited to, the product data, drawings, charts, programs, algorithms, and application examples.
 3. No license, express, implied or otherwise, is granted hereby under any patents, copyrights or other intellectual property rights of Renesas Electronics or others.
 4. You shall not alter, modify, copy, or reverse engineer any Renesas Electronics product, whether in whole or in part. Renesas Electronics disclaims any and all liability for any losses or damages incurred by you or third parties arising from such alteration, modification, copying or reverse engineering.
 5. Renesas Electronics products are classified according to the following two quality grades: "Standard" and "High Quality". The intended applications for each Renesas Electronics product depends on the product's quality grade, as indicated below.

"Standard": Computers; office equipment; communications equipment; test and measurement equipment; audio and visual equipment; home electronic appliances; machine tools; personal electronic equipment; industrial robots; etc.

"High Quality": Transportation equipment (automobiles, trains, ships, etc.); traffic control (traffic lights); large-scale communication equipment; key financial terminal systems; safety control equipment; etc.

Unless expressly designated as a high reliability product or a product for harsh environments in a Renesas Electronics data sheet or other Renesas Electronics document, Renesas Electronics products are not intended or authorized for use in products or systems that may pose a direct threat to human life or bodily injury (artificial life support devices or systems; surgical implantations; etc.), or may cause serious property damage (space system; undersea repeaters; nuclear power control systems; aircraft control systems; key plant systems; military equipment; etc.). Renesas Electronics disclaims any and all liability for any damages or losses incurred by you or any third parties arising from the use of any Renesas Electronics product that is inconsistent with any Renesas Electronics data sheet, user's manual or other Renesas Electronics document.
 6. When using Renesas Electronics products, refer to the latest product information (data sheets, user's manuals, application notes, "General Notes for Handling and Using Semiconductor Devices" in the reliability handbook, etc.), and ensure that usage conditions are within the ranges specified by Renesas Electronics with respect to maximum ratings, operating power supply voltage range, heat dissipation characteristics, installation, etc. Renesas Electronics disclaims any and all liability for any malfunctions, failure or accident arising out of the use of Renesas Electronics products outside of such specified ranges.
 7. Although Renesas Electronics endeavors to improve the quality and reliability of Renesas Electronics products, semiconductor products have specific characteristics, such as the occurrence of failure at a certain rate and malfunctions under certain use conditions. Unless designated as a high reliability product or a product for harsh environments in a Renesas Electronics data sheet or other Renesas Electronics document, Renesas Electronics products are not subject to radiation resistance design. You are responsible for implementing safety measures to guard against the possibility of bodily injury, injury or damage caused by fire, and/or danger to the public in the event of a failure or malfunction of Renesas Electronics products, such as safety design for hardware and software, including but not limited to redundancy, fire control and malfunction prevention, appropriate treatment for aging degradation or any other appropriate measures. Because the evaluation of microcomputer software alone is very difficult and impractical, you are responsible for evaluating the safety of the final products or systems manufactured by you.
 8. Please contact a Renesas Electronics sales office for details as to environmental matters such as the environmental compatibility of each Renesas Electronics product. You are responsible for carefully and sufficiently investigating applicable laws and regulations that regulate the inclusion or use of controlled substances, including without limitation, the EU RoHS Directive, and using Renesas Electronics products in compliance with all these applicable laws and regulations. Renesas Electronics disclaims any and all liability for damages or losses occurring as a result of your noncompliance with applicable laws and regulations.
 9. Renesas Electronics products and technologies shall not be used for or incorporated into any products or systems whose manufacture, use, or sale is prohibited under any applicable domestic or foreign laws or regulations. You shall comply with any applicable export control laws and regulations promulgated and administered by the governments of any countries asserting jurisdiction over the parties or transactions.
 10. It is the responsibility of the buyer or distributor of Renesas Electronics products, or any other party who distributes, disposes of, or otherwise sells or transfers the product to a third party, to notify such third party in advance of the contents and conditions set forth in this document.
 11. This document shall not be reprinted, reproduced or duplicated in any form, in whole or in part, without prior written consent of Renesas Electronics.
 12. Please contact a Renesas Electronics sales office if you have any questions regarding the information contained in this document or Renesas Electronics products.
- (Note 1) "Renesas Electronics" as used in this document means Renesas Electronics Corporation and also includes its directly or indirectly controlled subsidiaries.
- (Note 2) "Renesas Electronics product(s)" means any product developed or manufactured by or for Renesas Electronics.
