

No-Clean Desoldering Braid

Desoldering Braid 1814-1825, 1827, 1829

Introduction

Techspray's No-Clean Desoldering Braid has changed the perception of desoldering braids. It removes up to four times more solder than the conventional wick, and extracts the solder much, much faster than wicks based on Type R fluxes and outperforms competitors' no-clean braid. This flux improves the wicking action. The residue left behind is halide free and non-conductive so it does not have to be cleaned off the board! The No-Clean Desoldering Braid is designed to improve reworking efficiency in both conventional and no-clean operations.
