FEATURES

- **5-MHz Gain Bandwidth Product**
- **5-V/μs Slew Rate**
- **Low Noise: 20 nV/√Hz**
- **1.22-mA/Channel Supply Current**
- **V_{OS} < 3 mV Max**
- **Low Supply Voltage: 2.7 V to 5 V**
- **Rail-to-Rail Inputs and Outputs**
- **Unity Gain Stable**
- **1.5-μA Shutdown I_{CC}**
- **2.2-μs Turn On**

APPLICATIONS

- **Power-Amplifier Control Loops**
- **Cellular Phones**
- **Portable Equipment**
- **Wireless LANs**
- **Radio Systems**
- **Cordless Phones**

DESCRIPTION/ORDERING INFORMATION

The LMV712 dual operational amplifier is a high-performance BiCMOS operational amplifier intended for applications requiring rail-to-rail inputs, combined with speed and low noise. The device offers a bandwidth of 5 MHz, a slew rate of 5 V/μs, and operates with capacitive loads of up to 200 pF without oscillation.

The LMV712 offers two independent shutdown ($\overline{1SD}$, $\overline{2SD}$) pins. This feature allows disabling of each device separately and reduces the supply current to less than 1 μA typical. The output voltage rapidly and smoothly ramps up with no glitch as the amplifier comes out of the shutdown mode.

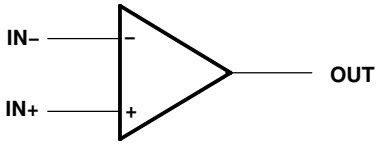
The LMV712 is offered in the space-saving SON (DRC) package and in an MSOP (DGS) package. These packages are designed to meet the demands of small size, low power, and low cost required by cellular phones and similar battery-operated portable electronics.

ORDERING INFORMATION

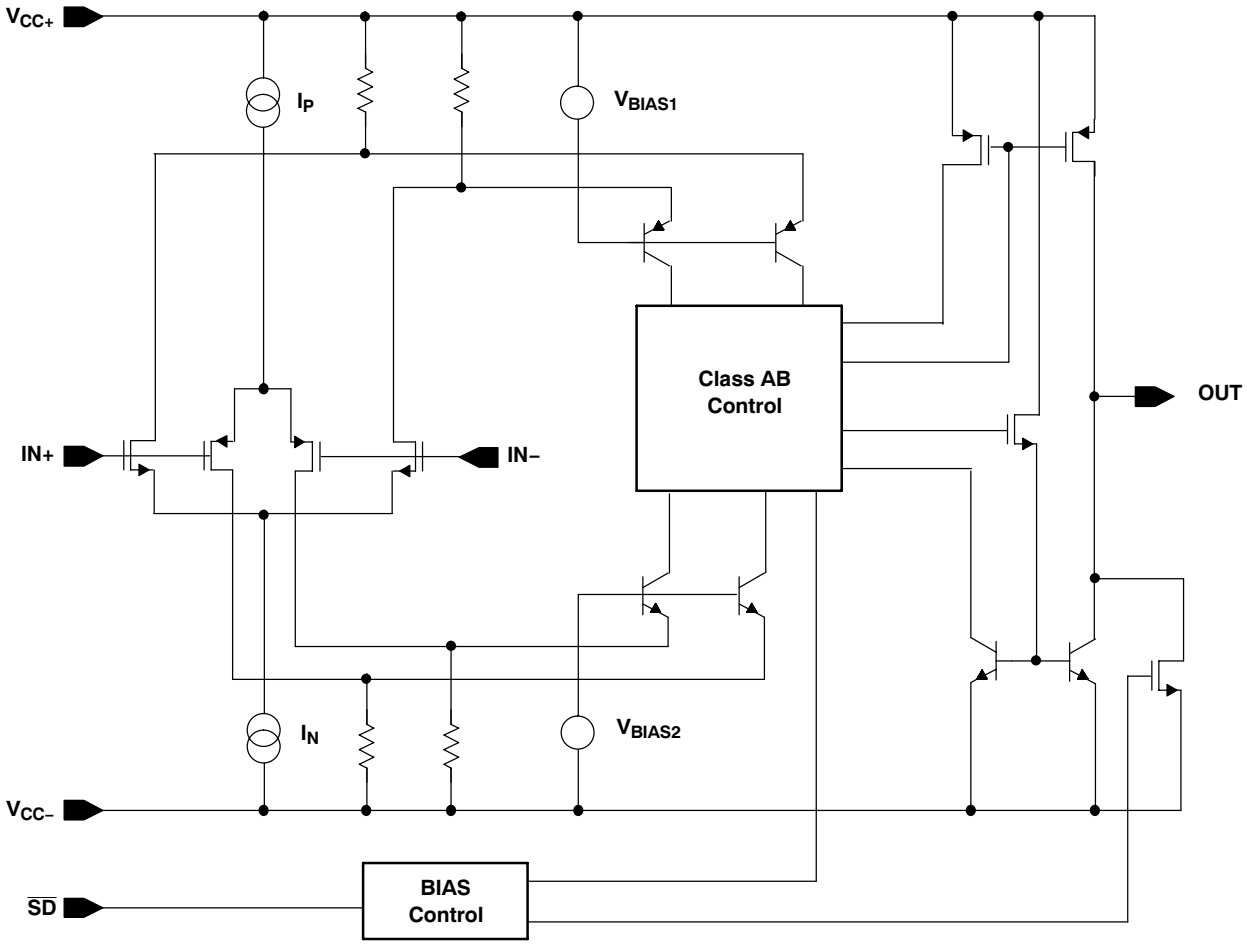
T_A	PACKAGE(1)		ORDERABLE PART NUMBER	TOP-SIDE MARKING
–40°C to 85°C	MSOP – DGS	Reel of 2500	LMV712IDGSR	RNB
		Reel of 250	LMV712IDGST	
	SON – DRC	Reel of 3000	LMV712IDRCR	PREVIEW
		Reel of 250	LMV712IDRCT	

(1) Package drawings, standard packing quantities, thermal data, symbolization, and PCB design guidelines are available at www.ti.com/sc/package.

SYMBOL (EACH AMPLIFIER)



SIMPLIFIED SCHEMATIC (EACH AMPLIFIER)



Absolute Maximum Ratings(1)

over operating free-air temperature range (unless otherwise noted)

			MIN	MAX	UNIT
$V_{CC+} - V_{CC-}$	Supply voltage(2)			5.5	V
V_{ID}	Differential input voltage(3)			±Supply voltage	V
V_I	Input voltage range (any input)		$V_{CC-} - 0.4$	$V_{CC+} + 0.4$	V
V_O	Output voltage range		$V_{CC-} - 0.4$	$V_{CC+} + 0.4$	V
I_I	Input current(4)			±10	mA
I_O	Output current			±50	mA
θ_{JA}	Package thermal impedance(5) (6)	DGS package		165	°C/W
		DRC package		TBD	
T_J	Operating virtual junction temperature			150	°C
T_{stg}	Storage temperature range		–65	150	°C

(1) Stresses beyond those listed under “absolute maximum ratings” may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated under “recommended operating conditions” is not implied. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.
(2) All voltage values (except differential voltages and V_{CC} specified for the measurement of I_{OS}) are with respect to the network GND.
(3) Differential voltages are at IN+ with respect to IN–.
(4) Excessive input current will flow if a differential input voltage in excess of approximately 0.6 V is applied between the inputs, unless some limiting resistance is used.
(5) Maximum power dissipation is a function of $T_J(max)$, θ_{JA}, and T_A. The maximum allowable power dissipation at any allowable ambient temperature is $P_D = (T_J(max) - T_A)/\theta_{JA}$. Operating at the absolute maximum T_J of 150°C can affect reliability.
(6) The package thermal impedance is calculated in accordance with JESD 51-7.

ESD Protection

	TYP	UNIT
Human-Body Model	1500	V
Machine Model	150	V

Recommended Operating Conditions

		MIN	MAX	UNIT
$V_{CC+} - V_{CC-}$	Supply voltage	2.7	5	V
T_A	Operating free-air temperature	–40	85	°C

Electrical Characteristics

V_{CC+} = 2.7 V, V_{CC-} = GND, V_{CM} = 1.35 V, and R_L > 1 MΩ (unless otherwise noted)

PARAMETER		TEST CONDITIONS		T_A	MIN	TYP	MAX	UNIT
V_{IO}	Input offset voltage	V_{CM} = 0.85 V and 1.85 V		25°C		0.4	3	mV
				–40°C to 85°C			3.2	
I_{IB}	Input bias current			25°C		5.5	115	pA
				–40°C to 85°C			130	
CMRR	Common-mode rejection ratio	0 ≤ V_{CM} ≤ 2.7 V		25°C	50	75		dB
				–40°C to 85°C	45			
PSRR	Power-supply rejection ratio	2.7 V ≤ V_{CC+} ≤ 5 V	V_{CM} = 0.85 V	25°C	70	90		dB
				–40°C to 85°C	68			
			V_{CM} = 1.85 V	25°C	70	90		
				–40°C to 85°C	68			
CMVR	Common-mode voltage range	CMRR ≥ 50 dB		25°C		–0.3	–0.2	V
					2.9	3		
I_{SC}	Output short-circuit current(1)	Sourcing V_O = 0		25°C	15	25		mA
				–40°C to 85°C	12			
		Sinking V_O = 2.7 V		25°C	25	50		
				–40°C to 85°C	22			
V_O	Output voltage swing	R_L = 10 kΩ to 1.35 V	V_{OH}	25°C	2.62	2.68		V
				–40°C to 85°C	2.6			
			V_{OL}	25°C		0.01	0.12	
				–40°C to 85°C			0.15	
		R_L = 600 Ω to 1.35 V	V_{OH}	25°C	2.52	2.55		
				–40°C to 85°C	2.5			
			V_{OL}	25°C		0.05	0.23	
				–40°C to 85°C			0.3	
$V_{O(SD)}$	Output voltage level in shutdown mode			25°C		10	200	mV
I_{CC}	Supply current per channel	ON mode		25°C		1.22	1.7	mA
				–40°C to 85°C			1.9	
		Shutdown mode		25°C		0.12	1.5	μA
				–40°C to 85°C			2	
A_{VOL}	Large-signal voltage gain	Sourcing R_L = 10 kΩ, V_O = 1.35 V to 2.3 V		25°C	80	115		dB
				–40°C to 85°C	76			
		Sinking R_L = 10 kΩ, V_O = 0.4 V to 1.35 V		25°C	80	113		
				–40°C to 85°C	76			
		Sourcing R_L = 600 Ω, V_O = 1.35 V to 2.2 V		25°C	80	97		
				–40°C to 85°C	76			
		Sinking R_L = 600 Ω, V_O = 0.5 V to 1.35 V		25°C	80	100		
				–40°C to 85°C	76			
V_{SD}	Shutdown pin voltage	ON mode		25°C	2.4 to 2.7	2 to 2.7		V
		Shutdown mode			0 to 0.8	0 to 1		
GBWP	Gain bandwidth product			25°C		5		MHz
SR(2)	Slew rate			25°C		5		V/μs
Φ_m	Phase margin			25°C		60		°
V_n	Input referred voltage noise	f = 1 kHz		25°C		20		nV/√Hz

(1) Shorting the output to either supply rail adversely affects reliability.
(2) Number specified is the slower of the positive and negative slew rates.

Electrical Characteristics (continued)

V_{CC+} = 2.7 V, V_{CC-} = GND, V_{CM} = 1.35 V, and R_L > 1 MΩ (unless otherwise noted)

PARAMETER		TEST CONDITIONS	T_A	MIN	TYP	MAX	UNIT
$T_{(on)}$	Turn-on time from shutdown		25°C		2.2	4	μs
						4.6	

Electrical Characteristics

V_{CC+} = 5 V, V_{CC-} = GND, V_{CM} = 2.5 V, and R_L > 1 MΩ (unless otherwise noted)

PARAMETER		TEST CONDITIONS		T_A	MIN	TYP	MAX	UNIT

(1) The marketing status values are defined as follows:
ACTIVE: Product device recommended for new designs.
LIFEBUY: TI has announced that the device will be discontinued, and a lifetime-buy period is in effect.
NRND: Not recommended for new designs. Device is in production to support existing customers, but TI does not recommend using this part in a new design.
PREVIEW: Device has been announced but is not in production. Samples may or may not be available.
OBSOLETE: TI has discontinued the production of the device.

(2) Eco Plan - The planned eco-friendly classification: Pb-Free (RoHS), Pb-Free (RoHS Exempt), or Green (RoHS & no Sb/Br) - please check http://www.ti.com/productcontent for the latest availability information and additional product content details.
TBD: The Pb-Free/Green conversion plan has not been defined.
Pb-Free (RoHS): TI's terms "Lead-Free" or "Pb-Free" mean semiconductor products that are compatible with the current RoHS requirements for all 6 substances, including the requirement that lead not exceed 0.1% by weight in homogeneous materials. Where designed to be soldered at high temperatures, TI Pb-Free products are suitable for use in specified lead-free processes.
Pb-Free (RoHS Exempt): This component has a RoHS exemption for either 1) lead-based flip-chip solder bumps used between the die and package, or 2) lead-based die adhesive used between the die and leadframe. The component is otherwise considered Pb-Free (RoHS compatible) as defined above.
Green (RoHS & no Sb/Br): TI defines "Green" to mean Pb-Free (RoHS compatible), and free of Bromine (Br) and Antimony (Sb) based flame retardants (Br or Sb do not exceed 0.1% by weight in homogeneous material)

(3) MSL, Peak Temp. -- The Moisture Sensitivity Level rating according to the JEDEC industry standard classifications, and peak solder temperature.

IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, modifications, enhancements, improvements, and other changes to its products and services at any time and to discontinue any product or service without notice. Customers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All products are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its hardware products to the specifications applicable at the time of sale in accordance with TI's standard warranty. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by government requirements, testing of all parameters of each product is not necessarily performed.

TI assumes no liability for applications assistance or customer product design. Customers are responsible for their products and applications using TI components. To minimize the risks associated with customer products and applications, customers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any TI patent right, copyright, mask work right, or other TI intellectual property right relating to any combination, machine, or process in which TI products or services are used. Information published by TI regarding third-party products or services does not constitute a license from TI to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of TI information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. Reproduction of this information with alteration is an unfair and deceptive business practice. TI is not responsible or liable for such altered documentation. Information of third parties may be subject to additional restrictions.

Resale of TI products or services with statements different from or beyond the parameters stated by TI for that product or service voids all express and any implied warranties for the associated TI product or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.

TI products are not authorized for use in safety-critical applications (such as life support) where a failure of the TI product would reasonably be expected to cause severe personal injury or death, unless officers of the parties have executed an agreement specifically governing such use. Buyers represent that they have all necessary expertise in the safety and regulatory ramifications of their applications, and acknowledge and agree that they are solely responsible for all legal, regulatory and safety-related requirements concerning their products and any use of TI products in such safety-critical applications, notwithstanding any applications-related information or support that may be provided by TI. Further, Buyers must fully indemnify TI and its representatives against any damages arising out of the use of TI products in such safety-critical applications.

TI products are neither designed nor intended for use in military/aerospace applications or environments unless the TI products are specifically designated by TI as military-grade or "enhanced plastic." Only products designated by TI as military-grade meet military specifications. Buyers acknowledge and agree that any such use of TI products which TI has not designated as military-grade is solely at the Buyer's risk, and that they are solely responsible for compliance with all legal and regulatory requirements in connection with such use.

TI products are neither designed nor intended for use in automotive applications or environments unless the specific TI products are designated by TI as compliant with ISO/TS 16949 requirements. Buyers acknowledge and agree that, if they use any non-designated products in automotive applications, TI will not be responsible for any failure to meet such requirements.
