# PGT®120.COM Data Terminal 2
## (Part No.: 7100.PGT120.COM.DT)

The "Data Terminal 2", is a modular system for recording and processing Personnel Grounding Tester's test data. A basic system consists of:  PGT120.COM **(1)** and Data Terminal **(2)**.
Test data can be stored for one month inside the device. The data can be retrieved by a web browser from any computer when connected to a network.

Test data can be imported to Time Attendance or Access Control systems via network interface.

### _Remote PC functions when connected to network:_
- List of measurement data with coloured marking of failed tests
- Printed test results list
- WEB-interface  for easy configuration
- German and  English support

### _Overview_

Certified by DQS

## *Interface Connection Example*

Two USB ports are available
on the Data Terminal. For multiple
extensions use a USB-HUB as distributor.

## *Measurement*

| Date | Time | Shoe left | Shoe right | Wrist strap | Result | ID | Temp. | RH |
|------|------|-----------|------------|-------------|--------|----|-------|-----|
| 2011-02-04 | 13:37 | 97.1 MΩ | 20.2 MΩ | | UserID missing | | 26.0°C | 31.0% |
