

USB C to HDMI External Video Adapter (M/F), 2048 x 1152 (1080p)

MODEL NUMBER: **U444-06N-HD**

Description

The U444-06N-HD USB 3.1 Gen 1 to HDMI Dual/Multi-Monitor External Video Graphics Card Adapter lets you connect an additional HDMI monitor, television or projector to the USB Type-C™ (USB-C™) port on your computer, tablet, Ultrabook or smartphone. It's an ideal tool for multitasking, viewing large spreadsheets across screens, editing documents, giving presentations at trade shows and conferences, or playing games and watching movies on large screens.

You can extend video from your primary display to another or duplicate the same desktop on both displays. No external power supply is needed. You can use up to six U444-06N-HD adapters at the same time, connecting up to six additional monitors to a single computer. Just connect the built-in USB-C cable to the USB-C port on your smartphone, tablet, Ultrabook or computer. Then, connect the adapter's HDMI port to a monitor using an HDMI cable to see and hear full high-definition (HD) audio and video.

The U444-06N-HD supports USB 3.1 Gen 1 data transfer speeds up to 5 Gbps, which is ten times faster than USB 2.0. It also supports HD video resolutions up to 2048 x 1152 (60 Hz), including 1080p, and 5.1-channel surround sound. It's compatible with Windows 7 and later, as well as Mac OS X 10.8.5 and later.

Features

Easy to Add a Display

- Adds an HDMI monitor, television or projector by connecting it to the USB Type-C™ (USB-C™) port on your computer, tablet, Ultrabook or smartphone
- Extend video to a second monitor, or duplicate the same desktop on both monitors
- Ideal for multitasking, viewing spreadsheet data, editing documents, giving presentations, watching movies and playing video games
- Add up to 6 adapters to connect 6 additional monitors to one computer
