Product description

The LISA-C200 module provides CDMA2000 1xRTT data and voice communication in a compact SMT form factor. These are fully qualified and certified modules, featuring low power consumption and a rich set of Internet protocols.

LISA-C200 modules are ideally suited to M2M applications such as fleet management, Automatic Meter Reading (AMR), people and asset tracking, surveillance and security and Point of Sales (PoS) terminals.

The LISA-C200 is form factor compatible with the LISA-U2, TOBY, SARA and LEON module families, enabling straightforward development of products supporting either CDMA,

UMTS/HSPA, LTE, or GSM/GPRS wireless technology with the same application board. This allows customers to take maximum advantage of their hardware and software investments.

The dual-band LISA-C200 modules are certified by Sprint, Verizon and Aeris. It is qualified according to ISO 16750 – Environmental conditions and electrical testing for electrical and electronic equipment for road vehicles.
