Santa Ana, Ca 92831

CERTIFICATE OF REACH COMPLIANCE

In response to your inquiry regarding ITT's Interconnect Solutions compliance to the European Union Regulation (1907/2006) concerning the Registration, Evaluation and Authorisation of Chemicals, (REACH), please be advised of the following:

Awareness and Focus: ITT is fully aware of the European REACH regulation and has allocated resources to deal with all legislative requirements and business continuity concerns related to REACH.

Registration of Substances: Since our products are not intended to release any substance under normal and reasonably foreseeable conditions of use we are exempt from any registering requirements with the European Chemical Agency. However, although ITT is principally a supplier of articles which do not require registration, we have begun, and will continue, to contact our suppliers of "substances, preparations and articles" to ensure that all necessary pre-registration, registration and notification requirements are being complied with in the required timeline. This effort extends to all materials used by ITT that are within the scope of REACH and with regards to application in which the materials are used in our products.

Notification & Substances of Very High Concern (SVHCs): According to our current knowledge, the articles you have inquired about and its packaging material does not contain any of the substances published in the latest candidate list (<http://echa.europa.eu/>) in concentrations above 0.1 % weight by weight or produce more than 1 ton per year. Rest assured, if any SVHC is identified in any of our products above the threshold, ITT will communicate to our customers sufficient information to allow for the safe use of the article and the naming of the substance.
