UMW AD8531,AD8532,AD8534

Low Cost, 250 mA Output, Single-Supply Amplifiers

1.Description

The AD8531, AD8532, and AD8534 are single, dual, and quad rail-to-rail input/output single-supply amplifiers featuring 250 mA output drive current. This high output current makes these amplifiers excellent for driving either resistive or capacitive loads. AC performance is very good with 3 MHz bandwidth,5 V/μs slew rate, and low distortion. All are guaranteed to operate from a 3 V single supply as well as a 5 V supply.

2.Features

- Single-supply operation: 2.7 V to 6 V
- High output current: ±250 mA
- Low supply current: 750 μA/amplifier
- Wide bandwidth: 3 MHz
- Slew rate: 5 V/μs
- No phase reversal
- Low input currents
- Unity gain stable
- Rail-to-rail input and output

3.Applications

- Multimedia audio
- LCD drivers
- ASIC input or output amplifiers
- Headphone drivers
