# DUAL BUFFER/DRIVER WITH OPEN-DRAIN OUTPUTS

#### **FEATURES**

- Controlled Baseline
  - One Assembly Site
  - One Test Site
  - One Fabrication Site
- Extended Temperature Performance of -55°C to 125°C
- Enhanced Diminishing Manufacturing Sources (DMS) Support
- Enhanced Product-Change Notification
- Qualification Pedigree (1)
- Supports 5-V V<sub>CC</sub> Operation
- (1) Component qualification in accordance with JEDEC and industry standards to ensure reliable operation over an extended temperature range. This includes, but is not limited to, Highly Accelerated Stress Test (HAST) or biased 85/85, temperature cycle, autoclave or unbiased HAST, electromigration, bond intermetallic life, and mold compound life. Such qualification testing should not be viewed as justifying use of this component beyond specified performance and environmental limits.

- Inputs and Open-Drain Outputs Accept Voltages up to 5.5 V
- Max t<sub>pd</sub> of 5.7 ns at 3.3 V
- Low Power Consumption, 10 μA Max I<sub>CC</sub>
- ±24-mA Output Drive at 3.3 V
- Typical V<sub>OLP</sub> (Output Ground Bounce)
   <0.8 V at V<sub>CC</sub> = 3.3 V, T<sub>A</sub> = 25°C
- Typical V<sub>OHV</sub> (Output V<sub>OH</sub> Undershoot)
   >2 V at V<sub>CC</sub> = 3.3 V, T<sub>A</sub> = 25°C
- I<sub>off</sub> Supports Partial-Power-Down Mode Operation
- Latch-Up Performance Exceeds 100 mA Per JESD 78, Class II
- ESD Protection Exceeds JESD 22
  - 2000-V Human-Body Model (A114-A)
  - 200-V Machine Model (A115-A)
  - 1000-V Charged-Device Model (C101)

See mechanical drawings for dimensions.

#### **DESCRIPTION/ORDERING INFORMATION**

This dual buffer/driver is designed for 1.65-V to 5.5-V  $V_{CC}$  operation. The output of the SN74LVC2G07 is open drain and can be connected to other open-drain outputs to implement active low wired OR or active high wired AND functions. The maximum sink current is 32 mA.

This device is fully specified for partial power-down applications using  $I_{off}$ . The  $I_{off}$  circuitry disables the outputs, preventing damaging current backflow through the device when it is powered down.

#### ORDERING INFORMATION(1)

T <sub>A</sub>	PACKAGE <sup>(2)</sup>		ORDERABLE PART NUMBER	TOP-SIDE MARKING
-55°C to 125°C	SOT (SC-70) - DCK	Reel of 250	SN74LVC2G07MDCKTEP	CHC

- (1) For the most current package and ordering information, see the Package Option Addendum at the end of this document, or see the TI website at www.ti.com.
- Package drawings, thermal data, and symbolization are available at www.ti.com/packaging.

Please be aware that an important notice concerning availability, standard warranty, and use in critical applications of Texas Instruments semiconductor products and disclaimers thereto appears at the end of this data sheet.

## FUNCTION TABLE (EACH BUFFER/DRIVER)

INPUT A	OUTPUT Y
Н	Н
L	L

#### LOGIC DIAGRAM (POSITIVE LOGIC)

## Absolute Maximum Ratings(1)

over operating free-air temperature range (unless otherwise noted)

			MIN	MAX	UNIT
V <sub>CC</sub>	Supply voltage range		-0.5	6.5	V
VI	Input voltage range (2)	-0.5	6.5	V	
Vo	Voltage range applied to any output in the high	-0.5	6.5	V	
Vo	Voltage range applied to any output in the high	or low state <sup>(2)(3)</sup>	-0.5	6.5	V
I <sub>IK</sub>	Input clamp current	V <sub>I</sub> < 0		-50	mA
I <sub>OK</sub>	Output clamp current	V <sub>O</sub> < 0		-50	mA
lo	Continuous output current			±50	mA
	Continuous current through V <sub>CC</sub> or GND			±100	mA
$\theta_{JA}$	Package thermal impedance <sup>(4)</sup>	DCK package		259	°C/W
T <sub>stg</sub>	Storage temperature range		-65	150	°C

<sup>(1)</sup> Stresses beyond those listed under "absolute maximum ratings" may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated under "recommended operating conditions" is not implied. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.

<sup>(2)</sup> The input negative-voltage and output voltage ratings may be exceeded if the input and output current ratings are observed.

<sup>(3)</sup> The value of V<sub>CC</sub> is provided in the recommended operating conditions table.

<sup>(4)</sup> The package thermal impedance is calculated in accordance with JESD 51-7.

www.ti.com SCES719-MAY 2008

## **Recommended Operating Conditions**

			MIN	MAX	UNIT		
.,	Complexional	Operating	1.65	5.5	V		
$V_{CC}$	Supply voltage	Data retention only	1.5		V		
		V <sub>CC</sub> = 1.65 V to 1.95 V	$0.65 \times V_{CC}$				
.,	High level input valte as	V <sub>CC</sub> = 2.3 V to 2.7 V	1.7				
$V_{IH}$	High-level input voltage	V <sub>CC</sub> = 3 V to 3.6 V	2		V		
		V <sub>CC</sub> = 4.5 V to 5.5 V	$0.7 \times V_{CC}$				
		V <sub>CC</sub> = 1.65 V to 1.95 V		$0.35 \times V_{CC}$	-		
V	Law laval innut valta na	V <sub>CC</sub> = 2.3 V to 2.7 V		V			
$V_{IL}$	Low-level input voltage	V <sub>CC</sub> = 3 V to 3.6 V		0.8 0.3 × V <sub>CC</sub>			
		V <sub>CC</sub> = 4.5 V to 5.5 V					
V <sub>I</sub>	Input voltage		0	5.5	V

5 V $\pm$ 0.5 V	V <sub>cc</sub>	≤2.5 ns	V <sub>cc</sub> /2	2 × V <sub>cc</sub>	50 pF	<b>500</b> Ω	0.3 V

NOTES: A.  $C_L$  includes probe and jig capacitance.

- B. Waveform 1 is for an output with internal conditions such that the output is low, except when disabled by the output control. Waveform 2 is for an output with internal conditions such that the output is high, except when disabled by the output control.
- C. All input pulses are supplied by generators have the following characteristics: PRR  $\leq$  10 MHz,  $Z_{\rm o}$  = 50  $\Omega.$
- D. The outputs are measured one at a time, with one transition per measurement.
- E. Because this device has open-drain outputs,  $t_{\text{PLZ}}$  and  $t_{\text{PZL}}$  are the same as  $t_{\text{PD}}$ .
- F.  $t_{PZI}$  is measured at  $V_{M}$ .
- G.  $t_{PLZ}$  is measured at  $V_{OL} + V_{\Delta}$ .
- H. All parameters and waveforms are not applicable to all devices.

<sup>(1)</sup> Status: For more details on status, see our product life cycle.

Multiple part markings will be inside parentheses. Only one part marking contained in parentheses and separated by a "~" will appear on a part. If a line is indented then it is a continuation of the previous line and the two combined represent the entire part marking for that device.

Important Information and Disclaimer: The information provided on this page represents TI's knowledge and belief as of the date that it is provided. TI bases its knowledge and belief on information provided by third parties, and makes no representation or warranty as to the accuracy of such information. Efforts are underway to better integrate information from third parties. TI has taken and continues to take reasonable steps to provide representative and accurate information but may not have conducted destructive testing or chemical analysis on incoming materials and chemicals. TI and TI suppliers consider certain information to be proprietary, and thus CAS numbers and other limited information may not be available for release.

In no event shall TI's liability arising out of such information exceed the total purchase price of the TI part(s) at issue in this document sold by TI to Customer on an annual basis.

#### OTHER QUALIFIED VERSIONS OF SN74LVC2G07-EP:

Catalog: SN74LVC2G07

<sup>(2)</sup> Material type: When designated, preproduction parts are prototypes/experimental devices, and are not yet approved or released for full production. Testing and final process, including without limitation quality assurance, reliability performance testing, and/or process qualification, may not yet be complete, and this item is subject to further changes or possible discontinuation. If available for ordering, purchases will be subject to an additional waiver at checkout, and are intended for early internal evaluation purposes only. These items are sold without warranties of any kind.

<sup>(3)</sup> RoHS values: Yes, No, RoHS Exempt. See the TI RoHS Statement for additional information and value definition.

<sup>(4)</sup> Lead finish/Ball material: Parts may have multiple material finish options. Finish options are separated by a vertical ruled line. Lead finish/Ball material values may wrap to two lines if the finish value exceeds the maximum column width.

<sup>(5)</sup> MSL rating/Peak reflow: The moisture sensitivity level ratings and peak solder (reflow) temperatures. In the event that a part has multiple moisture sensitivity ratings, only the lowest level per JEDEC standards is shown. Refer to the shipping label for the actual reflow temperature that will be used to mount the part to the printed circuit board.

<sup>(6)</sup> Part marking: There may be an additional marking, which relates to the logo, the lot trace code information, or the environmental category of the part.
