

Introduction to the SMD Product Listing

Each Standard Microcircuit Drawing (SMD) part number that Atmel supplies corresponds to an Atmel /883 part number. SMD products are compliant to MIL-STD-883, paragraph 1.2.1 and to the requirements of the applicable standard microcircuit drawing. The tables in this section list the currently approved Atmel SMD parts by Atmel part number (Table 1) and by SMD part number (Table 2). They define and cross reference the Atmel /883 part number with the SMD part number for your ordering convenience.

Figure 1 (below) shows how an Atmel SMD order number defines a part, compared to the components of the Atmel similar part number.

Please note that some SMD part numbers contain the letter "M" between the device type and the case outline designator. The "M" is part of the one part-one number system, set up by DESC. It is a device class designator which indicates the part is an SMD part number as opposed to being a JAN part number.

Figure 1. Components of an SMD number (top) compared to the Atmel similar part number (bottom).

How to Use the Atmel Part Type Reference Table

The organization of Table 1 enables the purchaser to order a standardized military part by using the Atmel generic part type to locate the correct SMD drawing number. The SMD part number is the order number for SMD devices. The Atmel generic part type, which begins with the prefix "AT," heads Table 1. There are four sections in this table (see sample table below):

SMD Options

The first section lists the SMD options available at Atmel. It includes the industry generic part type, the SMD drawing number, and the SMD device type. The SMD case outline options, the lead finish options, the circuit description, and the access time that correspond to that device type are also included. The tables for the EEPROM in this section

include the end write indicator in the circuit description column and the write mode for the specific device type.

Order Code Cross-Reference

The next section of the table cross-references each optionally complete SMD part number (see ❶ below) with the Atmel similar /883 part number (see ❷ below).

Case Outline Legend

The third section gives the SMD case outline options available for the device.

Lead Finish Legend

The last section lists the SMD lead finish options available for the device.

SMD Options with Part Description and Specifications	AT28C64B									
	Generic Number		Standard Microcircuit Drawing Number				Description			
	28C64B	Drawing Number	Device Type	Case Outline	Lead Finish	Circuit Description End Write Indicator	Write Mode	Access Time (ns)	Write Speed (ns)	Endurance (Cycles)
		5962-87514	08	X	X, A	8K x 8 E ² PROM Data Polling	Byte/Page	250	10	10K
		5962-87514	09	X	X, A	8K x 8 E ² PROM Data Polling	Byte/Page	200	10	10K
Order Code Cross-Reference	Atmel Case No. 1FN41	Example: Atmel Order Number				Atmel Similar Part Number				
		❶ 5962-87514 08 XX				❷ AT28C64B-25DM/883				
		5962-87514 09 XX				AT28C64B-20DM/883				
Case Outline Legend	Case Outline									
	X	28D6, 28 Lead, 0.600" Wide, Non-Windowed, Ceramic Dual Inline Package (Cerdip)								
	Lead Finish									
Lead Finish Legend	X	Denotes no preference in lead finish; Finish A will be supplied (per paragraph 30.6.2.7 of MIL-1-38535B Appendix A)								
	A	Hot Solder Dip								

Note: Finish letter "X" shall not be marked on the microcircuit or its packaging. This designation is provided for use in drawings, part lists, purchase orders, or other documentation where lead finishes A, B or C are all considered acceptable and interchangeable without preference. For Government logistic support, the A lead finish will be acquired and supplied to the end user when the X is included in the PIN for lead finish. If the PIN is not available with the A lead finish, the same PIN will be acquired except with the B or C lead finish designator as determined by availability. Type C terminal material is a fired on metallization used with lead-less chip carriers.

How to Use the Atmel SMD Number Reference Table

Table 2 allows quick reference to the Atmel /883 similar part number when the SMD part number is known by the purchaser. The head for Table 2 is the SMD drawing number (see the example table below). The only section in this table is a cross-reference between the optionally complete SMD drawing number (see ❶ below) and the correspond-

ing Atmel similar /883 part number (see ❷ below). It also includes the circuit description and access time for that part number. The EEPROM tables include the end write indicator (which is in the circuit description column) the write mode, the write speed, and the endurance cycles for the specific part number.

Order Codes		Part Description and Specifications					
5962-87514							
Order Code Cross-Reference	❶ Atmel Order Number	❷ Atmel Similar Part Number	Circuit Description End Write Indicator	Write Mode	Access Time (ns)	Write Spd. (ns)	Endur. (Cycles)
	5962-87514 08 XX	AT28C64B-25DM/883	8K x 8 E ² PROM Data Polling	Byte/Page	250	10	10K
