

Release Notes for RN171/RN131 v4.85

The following are the improvements (issue fixes) over v4.83 of the RN171 WiFly firmware.

- a. **AP is not able to accept a connection from a Samsung S7 (Android 7) as client**
 - i. Fixed the regression caused by the SoftAP improvements in RN WiFly v4.80 and onwards
- b. **Problems with connecting RN 1x1 Client to RN1x1**
 - i. Improved the KrackAttack fixes to initialize GTK key
 - ii. SoftAP will accept client regardless of privacy-bit in IE
