

# Release Notes RN171/RN131 v4.83

---

Added fix for the following WPA/WPA2 Krack attack scenarios on EAP application (PEAP) and addressed corner case issues on wifly application.

## **WPA/WPA2 protocol vulnerabilities**

- Pairwise key reinstallations in the 4-way handshake
- Group key reinstallations in the group key handshake (or client accepts replayed broadcast frames)
- "group key reinstallation in the 4-way handshake"
