

# LOW EMI CURRENT SENSE HIGH SIDE SWITCH

#### **Features**

- Load current feedback
- Programmable over current shutdown
- Active clamp
- ESD protection
- Input referenced to Vcc
- Over temperature shutdown
- Switching time optimized for low EMI
- Reverse battery protection
- Lead-Free, Halogen-Free, RoHS compliant

### **Description**

The AUIR3320(S) is a fully protected 4 terminals high side switch. The input signal is referenced to Vcc. When the input voltage Vcc - Vin is higher than the specified threshold, the output power Mosfet is turned on. When the Vcc - Vin is lower than the specified Vil threshold, the output Mosfet is turned off. A current proportional to the power Mosfet current is sourced to the Ifb pin. Over current shutdown occurs when Vifb-Vin > 4.7V. The current shutdown threshold is adjusted by selecting the proper RIfb. Either over current and over temperature latches off the switch. The device is reset by pulling the input pin high. Other integrated protections (ESD, reverse battery, active clamp) make the switch very rugged in automotive environment.

# **Product Summary**

 $\begin{array}{lll} \text{Rds(on)} & 4 \text{ m}\Omega \text{ max.} \\ \text{Vcc op.} & 6 \text{ to 26V} \\ \text{Current Ratio} & 6000 \\ \text{Prog. Ishutdown} & 10 \text{ to 55A} \\ \text{Vclamp} & 40V \\ \end{array}$ 

# **Packages**

D<sup>2</sup>Pak Pin 4 and 5 fused AUIR3320S

# **Typical Connection**

\*The diode between the collector and the emitor is necessary for the reverse battery protection

2017-7-11

# **Absolute Maximum Ratings**

Absolute maximum ratings indicate sustained limits beyond which damage to the device may occur. All voltage parameters are referenced to Vcc lead. (Tj=-40°..150°C, Vcc=6.26V Tambient=25°C unless otherwise specified).

| Symbol        | Parameter  | Min.     | Max. | Units |

# **Recommended Operating Conditions**

These values are given for a quick design. For operation outside these conditions, please consult the application notes.

| Symbol     | Parameter                           | Min. | Max. | Units |
|------------|-------------------------------------|------|------|-------|
|            | Continuous output current           |      |      |       |
| lout       | Tambient=85°C, Rth=5°C/W, Tj=150°C  |      | 45   | Α     |
|            | Tambient=85°C, Rth=40°C/W, Tj=150°C |      | 16   |       |
| Rifb       | Recommended Ifb resistor (2)(3)     |      | 3.5  | kΩ    |
| Pulse min. | Minimum turn-on pulse width         |      | _    | ms    |
| Fmax.      | Maximum operating frequency         | _    | 200  | Hz    |

<sup>(2)</sup> If Rifb is too low, the device can be damaged.

<sup>(3)</sup> If Rifb is too high, the device may not switch on.

#### **Protection Characteristics**

Tj=-40°..150°C, Vcc=6..26V, Rifb=500 to 3.5kΩ. Typical value are given for Vcc=14V and Tj=25°C

#### NOTES

- 1. DIMENSIONING AND TOLERANCING AS PER ASME Y14.5M-1994
- 2. DIMENSIONS ARE SHOWN IN MILLIMETERS [INCHES].

MINENSION D & E DO NOT INCLUDE MOLD FLASH. MOLD FLASH SHALL NOT EXCEED 0.127 [.005"] PER SIDE. THESE DIMENSIONS ARE MEASURED AT THE OUTMOST EXTREMES OF THE PLASTIC BODY AT DATUM. H.

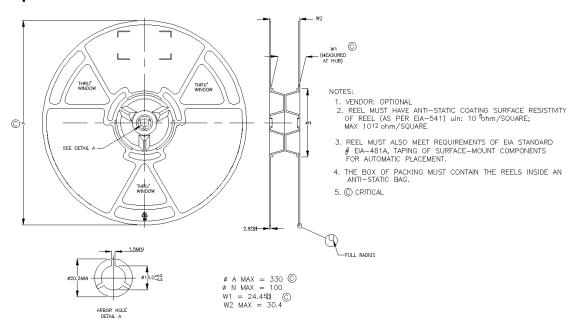

4. THERMAL PAD CONTOUR OPTIONAL WITHIN DIMENSION E, L1, D1 & E1.

5. DIMENSION 61 AND c1 APPLY TO BASE METAL ONLY.

- 6. DATUM A & B TO BE DETERMINED AT DATUM PLANE H.
- 7. CONTROLLING DIMENSION: INCH.
- 8. OUTLINE CONFORMS TO JEDEC OUTLINE TO-263BA.
