

# Dual Series Schottky Barrier Diodes

## BAT54CXV3

These Schottky barrier diodes are designed for high speed switching applications, circuit protection, and voltage clamping. Extremely low forward voltage reduces conduction loss. Miniature surface mount package is excellent for hand held and portable applications where space is limited.

### Features

- Extremely Fast Switching Speed
- Low Forward Voltage – 0.35 V (Typ) @  $I_F = 10$  mAdc
- These Devices are Pb-Free, Halogen Free/BFR Free and are RoHS Compliant

### MAXIMUM RATINGS ( $T_J = 125^\circ\text{C}$ unless otherwise noted)

| Rating                                                                                     | Symbol          | Value       | Unit                       |
|--------------------------------------------------------------------------------------------|-----------------|-------------|----------------------------|
| Reverse Voltage                                                                            | $V_R$           | 30          | V                          |

Product parametric performance is indicated in the Electrical Characteristics for the listed test conditions, unless otherwise noted. Product performance may not be indicated by the Electrical Characteristics if operated under different conditions.

- Notes:
1. A 2.0 kΩ variable resistor adjusted for a Forward Current ( $I_F$ ) of 10 mA.
  2. Input pulse is adjusted so  $I_{R(\text{peak})}$  is equal to 10 mA.
  3.  $t_p \gg t_{rr}$
